2-0219-11-000-00	Ordinary	Palm Oil Processors and/or Traders

Palm Oil Processors and Traders

Operational Profile

1.1 Please state your main activity(ies) within the supply chain

- Others:
Independant palm oil mill

1.2 Operation and Certification Progress

--

1.2.1 Do you have a system for calculating how much palm oil and palm oil products you use?

Yes

1.3 Total volume of all palm oil products handled in the year (Tonnes)

--

1.3.1 Total volume of Crude Palm Oil (CPO) handled in the year (Tonnes)

2,721

1.3.2 Total volume of Palm Kernel Oil (PKO) handled in the year (Tonnes)

--

1.3.3 Total volume of other Palm Oil Derivatives and Fractions handled in the year (Tonnes)

--

1.3.4 Total volume of all palm oil and palm oil derived products handled in the year (Tonnes)

2,721

1.4 Volume handled in the year that is RSPO-certified (Tonnes):

No	Description	Crude Palm Oil (Tonnes)	Palm kernel oil (Tonnes)	All other palm-based derivatives and fractions handled in the year that is RSPO-certified (Tonnes)
1.4.1	Book & Claim	-	-	-
1.4.2	Mass Balance	-	-	-
1.4.3	Segregated	-	-	-
1.4.4	Identity Preserved	2,721.24	-	-
1.4.5	Total volume of Oil Palm handled that is RSPO-certified:	2,721.24	-	-

What is the percentage of certified sustainable palm oil in the total palm oil your company sells in:

Europe --%
India --%
China --%
South East Asia --%
North America --%

What is the percentage of certified sustainable palm kernel oil in the total palm kernel oil your company sells in:

Europe --%
India --%
China --%
South East Asia --%
North America --%

Time-Bound Plan

2.1 Date of first supply chain certification (planned or achieved)

2015

Comment:

The date of first certification on 15/02/2012 with Control Union Certification; but circumstances have forced the plant to carry out a re-certification in 2015 for its palm oil production activities on the RSPO.

2.2 Time-bound plan - Year expected to achieve 100% RSPO certification of all supply chains

2020

Comment:

For its RSPO certification program AGRIVAR relies on a supply base with 4 cooperatives belonging to the southern region Comoé these cooperatives are groups of small independent oil palm producers. With these four cooperative, we was able to get RSPO certification. but we do not want to stop along the way to the extent that we plan to increase our production capacity of palm oil. in this context, we intend to add to the four cooperatives, the rest of the cooperatives of the sector Toumanguié area with about 4 cooperatives

2.3 What are your interim milestones towards achieving this RSPO certification commitment (year and progressive CSPO%)? Please state annual targets/strategies.

2015: RSPO audit and certification of the company palm oil mill with 4 coopératives (cooperative are groupe of individual small palm oil producers) these cooperatives are: OPP1 (Oil Palm Plantation): BIOPALM, OPP2: COOPPLATO, OPP3: COOPHAM MAFERE, OPP4: COOPPHA ADJOUAN.

2017: 1 cooperative : COOPALBO

2018: 1 coopérative: COOPALCI

2019: 1 coopérative: COOPTOSA

2020: 1 coopérative : COOPHAD

2.4 Timebound plan - Year expected to only "handle/supply" RSPO certified oil palm products

2020

Comment:

to finalize the certification of the whole sector producer groups Toumanguié, we will have reached most of the supply base and suddenly, he hardly subsitera more than non-certified products.

2.5 What are your interim milestones towards achieving this RSPO certification commitment (year and progressive CSPO%)? Please state annual targets/strategies.

2015: RSPO audit and certification of the company palm oil mill with 4 coopératives (cooperative are groupe of individual small palm oil producers) these cooperatives are: OPP1 (Oil Palm Plantation): BIOPALM, OPP2: COOPPLATO, OPP3: COOPHAM MAFERE, OPP4: COOPPHA ADJOUAN.

2017: 1 cooperative : COOPALBO

2018: 1 coopérative: COOPALCI

2019: 1 coopérative: COOPTOSA

2020: 1 coopérative : COOPHAD

2.6 How do you promote RSPO and RSPO certified sustainable palm oil to your customers proactively?

Recognizing the importance of our function as an intermediary between the producers of FFB and businesses of the secondary processing of palm oil, we decided to include all of our activities in sustainable development as Local requirements of Interpretation of the principles and international criteria of the RSPO.

This commitment has allowed us to structure different policies on labor, environmental preservation and protection of the safety and health at work. Moreover, we came up with the certification of our organization by a certification body.

So we started to organize small independent oil palm farmers in certification RSPO groups so that they fully benefit from the income of their activities on the one hand, and integrate the good cultural practices of palm oil 'somewhere else.

To achieve the objectives of promoting the sustainable production of palm oil on the RSPO, we implement social actions in the place of oil palm producers (payment at the right price, granting of production bonuses, activities supervision, provision of agricultural inputs, management of the entire certification process for producers who decide to engage in it).

GHG Emissions

3.1 Are you currently assessing the GHG emissions from your operations?

No

Please explain why

we are currently defining and validating the operational scope on the one hand and the identification of sources of direct emissions and indirect emissions sources on the other.

3.2 Do you publicly report the GHG emissions of your operations?

No

Please explain why

we are currently defining and validating the operational scope on the one hand and the identification of sources of direct emissions and indirect emissions sources on the other. Evaluation of the emission of greenhouse gases has not yet begun.

Actions for Next Reporting Period

4.1 Outline actions that you will take in the coming year to promote CSPO use along the supply chain

one of the major actions would be to maintain the certification process to the RSPO in which our company is engaged. in another time, we continue to promote sustainable production process of palm oil from other producers so that they engage in this process and that we can join a lot of oil palm producers.

ven in time, we will open other marchers to provide RSPO certified palm oil.

we always make it available to participate in various meetings of consultations and discussions on agriculture in general and in particular on the sustainable production of palm oil

Reasons for Non-Disclosure of Information

5.1 If you have not disclosed any of the above information please indicate the reasons why

RAS

Application of Principles & Criteria for all members sectors

6.1 Related to your sourcing, do you have (a) policy/ies, that are in line with the RSPO P&C such as:

- Water, land, energy and carbon footprints
[P-Policies-to-PNC-waterland.pdf](#)
- Ethical conduct and human rights
[P-Policies-to-PNC-ethicalconducthr.pdf](#)
- Labour rights
[P-Policies-to-PNC-laborrights.pdf](#)
- Stakeholder engagement
[P-Policies-to-PNC-stakeholderengagement.pdf](#)

6.2 Where relevant, what prevents you from trading/processing only CSPO?

RAS

Commitments to CSPO uptake

Congratulations, your commitments to CSPO uptake is already 100% certified

7.1. Do you have plans to immediately cover the gap using Book & Claim?

No

Please explain why:

--

Concession Map

Do you agree to share your concession maps with the RSPO?

Yes

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Major obstacles we encountered in the implementation of sustainable production process of palm oil are: Difficulty to be accompanied by the funding agencies. The entire process was financed from own background, which ultimately resulted in financial difficulty in continuing in the operation of the company's activities. Even upon the certificate, financing institutions are still slow to decide either to help maintain the certificate or to help us continue to promote the sustainable production of palm oil in the context of adhering a maximum of producers palm oil to this cause. Another difficulty we encountered was the language barrier. All documents that address issues of RSPO are all in English so that is not easily exploited by companies from francophone countries. We have, despite the lack of training materials that can help educate the producer group to the RSPO approach tried according to the means at our disposal to draft training material that we put at the disposal of our base supply.

2 How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

No

Robust:

No

Simpler to Comply to:

Yes

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Our company is in Ivory Coast the first company production of palm oil to join the RSPO and obtain the RSPO certification. To get there, we had to proceed with the local interpretation of international principles and criteria of the RSPO fault of the existence of a national interpretation. To date this document interpretation is the basis for drafting the document of national interpretation. In our certification process, we have combined small independent producers of oil palm to whom we provide technical and financial assistance to meet the requirements of the sustainable production of palm oil according to RSPO.

4 Other information on palm oil (sustainability reports, policies, other public information)
