

About your organisation			
Name of the organisation:	Neste Oil Corporation		
Membership number:	# 4-0010-06-000-00		
What is the primary activity or product of your organisation?	Neste Oil Corporation is a refining and marketing company concentrating on low-emission, high-quality traffic fuels. The company produces NExBTL Renewable diesel which is derived from vegetable oil, animal fats and other waste products. NExBTL is our premium product, cleaner with better quality and properties than the traditional diesel or biodiesel.	Other, please specify	N/A
In addition to your activities as a consumer goods manufacturers, does your company have significant activities in any other parts of the palm oil supply chain?	Trading		
Organisation profile	www.nesteoil.com		
Please list any related company operating within the palm oil supply chain, which is linked through more than 51% ownership. E.g. an affiliate, a majority shareholder in a joint venture, a subsidiary or a parent company	Neste Oil Singapore Pte Ltd, Neste Oil Netherlands	Member of the RSPO	Neste Oil Corporation
Operations and certification progress			
Total volume of CPO used per year (to nearest 500 tonnes)	628,500 tonnes	Certified volume - Greenpalm	0
	This total includes Stearin, PFAD besides CPO	Certified volume - mass balance	300,500.000
	The period is for October 2010 to September 2011.	Certified volume - segregated	0
	Palm oil will continue to be the single largest raw material input, and is expected to account for just under half of the total raw material used in renewable diesel production in 2011. The use of sidestreams generated during palm oil production, such as palm fatty acid distillate, and waste such as animal fat, will increase. Stearin, a by-product of the palm oil production process, is expected to account for over 20% of Neste Oil's renewable input in 2011, and palm fatty acid distillate for 5-10%. Waste animal fat is expected to account for just under 20% of renewable input. Other inputs, such as rapeseed oil, will account for the remainder.	Certified volume - Identity Preserved	0
Total volume of PKO used per year (to nearest 500 tonnes)	none	Volume certified (PKO)	0.00
Number of certified supply chains and which supply chain option they use	Identity Preserved (t) N/A	Certified volumes mentioned above include all certified sustainable palm oil systems	
	Segregation (t) N/A		
	Mass Balance (t) 1,500,000 million certified volume for feedstock (palm oil and others)		
Timebound plan - Year expected to achieve 100% certified palm oil used	2015		
Other information			
Other information (sustainability reports, policies, other public information)	Our sustainability report, policies and related information are available from our annual report. The annual report can be downloaded from the mainpage of www.nesteoil.com .

Further information on your organisation's commitment to sustainable palm oil	Neste Oil only buys responsibly produced feedstock, including palm oil. The palm oil which we buy are either certified or covered by an existing internationally recognized certification system (such as RSPO, ISCC). We never buy batches of palm oil which we do not know the origin of. Neste Oil has committed itself to only using 100% certified palm oil by the end of 2015.
