1) Our aim is to buy all the palm oil and palm oil derivatives (like e.g. palm fractions, hydro palm, palmkernel) we are using as Royal FrieslandCampina as sustainable as (commercially) possible; the timebound for this implementation is during the course of 2011 (most of it is implemented already). This means we will purchase SG if this is commercially available on the market; if not, we will purchase MB; if both are not available we will compensate the remaining volume with GreenPalm certificates. Implementing involves all our operations world wide; i.e. in Europe, Asia and Africa.

Implementing the above strategy will not per definition include certification of all production locations. This is dependent upon marketing/sales strategy. However our production location in Meppel - The Netherlands is already certified and the location in Lippstadt - Germany will follow on short term.
