1.2.1 Do you have a system for calculating how much palm oil and palm oil products you use?

Yes

1.3 Total volume of all palm oil products handled in the year (Tonnes)

--

1.3.1 Total volume of Crude Palm Oil (CPO) handled in the year

14706.00

1.3.2 Total volume of Palm Kernel Oil (PKO) handled in the year

2808.00

1.3.3 Total volume of other Palm Oil Derivatives and Fractions handled in the year

105018.00

1.3.4 Total volume of all palm oil and palm oil derived products handled in the year

122532.00

1.4 Volume handled in the year that is RSPO-certified (Tonnes):

No	Description	Crude Palm Oil (Tonnes)	Palm kernel oil (Tonnes)	All other palm-based derivatives and fractions handled in the year that is RSPO-certified (Tonnes)
1.4.1	Book & Claim	300.00	220.00	22162.00
1.4.2	Mass Balance		115.00	3763.00
1.4.3	Segregated	75.00		545.00
1.4.4	Identity Preserved

Time-Bound Plan

2.1 Date of first supply chain certification (planned or achieved)

2011

2.2 Time-bound plan - Year expected to achieve 100% RSPO certification of all supply chains

2017

2.3 What are your interim milestones towards achieving this RSPO certification commitment (year and progressive CSPO%)? Please state annual targets/strategies.

Interim Milestones will vary with each individual company based on local market requirements. Please refer to each individual company / country as required.

For Example British Bakels has been audited since 2011, Bakels Aromatic 2012, Australian Bakels 2014 but other companies may take longer.

2.4 Timebound plan - Year expected to only "handle/supply" RSPO certified oil palm products

2018

2.5 What are your interim milestones towards achieving this RSPO certification commitment (year and progressive CSPO%)? Please state annual targets/strategies.

Interim Milestones will vary with each individual company based on local market requirements. Please refer to each individual company / country as required.

2.6 How do you promote RSPO and RSPO certified sustainable palm oil to your customers proactively?

- 1) The sustainable products are summarised to the sales teams with guidance as to how to develop baked products based on only sustainable palm.
- 2) As sustainable materials become more readily available each company can switch to sustainable as a default. Supplying all customers regardless of stated need.
- 3) Bakels support those suppliers who provide IP, SG and MB products, highlight them to our customers and incorporate them into our products for their use.

GHG Emissions

3.1 Do you publicly report the GHG emissions of your operations?

No

Please upload related report:

--

Add link to website

--

Please explain why:

We are only now starting the process of calculating our greenhouse gas emissions for some of our companies. We are not yet in a position to declare these figures.

3.2 Does your company have a public commitment to only purchase palm oil from suppliers that disclose their GHG emissions?

No

Please upload related report:

--

--

Please explain why:

The supply chain is too long and varied at this time with no clear visibility of the source materials to verify if claims are correct.

Actions for Next Reporting Period**4.1 Outline actions that you will take in the coming year to promote CSPO use along the supply chain**

- 1) More Bakels Sites will be audited to RSPO standards.
- 2) IP,SG and MB material take up will be increased
- 3) Suppliers offering IP, SG and MB material will be supported over those that do not

Reasons for Non-Disclosure of Information**5.1 If you have not disclosed any of the above information please indicate the reasons why**

- 1) Interim milestones will vary with each individual company based on local market requirements. Please refer to each individual company / country as required.
- 2) The demand for sustainable material and therefore the potential supply varies significantly from Country to Country

Application of Principles & Criteria for all members sectors**6.1 Related to your sourcing, do you have (a) policy/ies, that are in line with the RSPO P&C such as:**

- Water, land, energy and carbon footprints
- Ethical conduct and human rights
- Labour rights

6.2 Where relevant, what prevents you from trading/processing only CSPO?

1) The Availability of key ingredients such as Double fractionated Palm Stearin is still an issue in IP, SG or MB as manufacturers have no outlet for the remaining sustainable Olein. This makes adding the very hard distillates into the sustainable supply chain very difficult - availability is still an issue.

Commitments to CSPO uptake

As you don't source 100% CSPO through physical supply chains (IP/SG/MB), please answer the following questions: Do you have plans to?

Yes

- Please explain why:

--

- Please specify:

As materials become available Bakels companies will switch to these materials as required.

- Do you have plans to immediately cover the gap using Book & Claim?

No

- How and when do you plan to immediately cover the gap using Book & Claim?

--

- Please explain why:

Some of our customers do not recognise book and claim as a suitable declaration of sustainability.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Availability of suitable materials is still an issue. No sucrose Ester supplier is fully certified. No distilled monoglyceride supplier is able to supply fully segregated or identity preserved materials. As these are not available there is now a significant move away from Palm to non palm based emulsifier systems in order to avoid the issues.

2 How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

Yes

Robust:

Yes

Simpler to Comply to:

equal

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Bakels has continually update customers with Sustainable product availability or alternatives.
