We have developed and implemented a scorecard system to optimise our RSPO certification efforts. This analytic management tool enables us to efficiently map progress across all estates and mills. In addition, we are improving our monitoring system in all of our estates and mills. We also have engaged a dedicated Sustainable Palm Oil officer to oversee all sustainability related activities, including RSPO certification.

2.5 What are your interim milestones towards achieving this RSPO certification commitment (year and progressive CSPO%)? Please state annual targets/strategies.

As an intermediary the percentage of CSPO we handle largely depends on other actors in the supply chain : producers as well as end consumers. We are fully committed to provide solutions to our customers to provide CSPO. However we feel it is unrealistic to put a time-bound to require 100% handling of only CSPO.

2.6 How do you promote RSPO and RSPO certified sustainable palm oil to your customers proactively?

We communicate our ability to deliver RSPO CSPO physical supply chain modules : MB and SG.
Also work with customers on additional requirements on top of RSPO such as trace-ability.

As you don't source 100% CSPO through physical supply chains (IP/SG/MB), please answer the following questions: Do you have plans to?

RSPO is not the only standard of CSPO out there. Also many markets do not yet demand CSPO.

No

- How and when do you plan to immediately cover the gap using Book & Claim?

--

- Please explain why:

We are concentrating our effort in promoting physical supply chain modules which based on customer inputs are more relevant to addressing trace-ability and sustainability concerns of consumers.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The main factors that have continued to impact our operating performance are international CPO price, production volumes and cost of production.

We have embedded sustainable practices in our day-to-day operations for years. We are constantly revitalising our SOPs to ensure that our sustainable operations are fully implemented.

2 How would you qualify RSPO standards as compared to other parallel standards?

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

GAR continues to work closely with RSPO and currently co-chairs the Indonesian HCV Task Force, which was formed to explore means of effectively securing HCV areas in oil palm development areas in Indonesia, in line with the RSPO Principles and Criteria ("P&C"), as well as to explore options to reform local and national laws and procedures to secure HCV areas and accommodate the RSPO P&C.

GAR is also a member of the Dispute Settlement Facility Advisory Group, HCV Compensation Task Force and the Biodiversity and High Conservation Values Working Group.
