Actions for Next Reporting Period

6.1 Outline actions that will be taken in the coming year to promote sustainable palm oil.

As from 2015 we only use CSPO. We do have intensive contacts to our stakeholders to discuss all questions around palmoil. There in we try to upgrade the used palmoil in Mass Balance to segregated palmoil.

Above all we work in the FONAP (Forum Nachhaltiges Palmoil).

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In the conversion to only using CSPO for it has been difficult in the case of glycerin. For the coming years we now found a solution.

Still it is difficult in those countries, that do not want to have palmoil at all. Neither conventional nor certificated sustainable.

Furthermore we see, that most of the countries in the world are not really interested in the issues of palmoil production.

These often are things we can not solve as company, but that has to be handled at first by politics, the society and last but not least the RSPO.

2 How would you qualify RSPO standards as compared to other parallel standards?
