6.2 Where relevant, what prevents you from trading/processing only CSPO?

Our customers (feed compounders) cannot afford to pay the RSPO premium (B&C, MB or CSPO) because their own customers do not want to pay for it, and the margins in the sector of activity are very thin. That is the reason why need to promote CSPO toward final customers, in order to create the demand. France is not the easiest location to do it, because palm oil image is very bad : health and environment, therefore there is a lot of work to be done before achieving the result.
