## Reasons for Non-Disclosure of Information

**5.1 If you have not disclosed any of the above information please indicate the reasons why**

Confidential

## Application of Principles & Criteria for all members sectors

**6.1 Related to your sourcing, do you have (a) policy/ies, that are in line with the RSPO P&C such as:**

- Water, land, energy and carbon footprints
- Land Use Rights
- Ethical conduct and human rights
- Labour rights
- Stakeholder engagement

**6.2 Where relevant, what prevents you from trading/processing only CSPO?**

Thai Palm Industry is different from those of Malaysia and Indonesia. Thai smallholders are the majority to supply palm fruit. Hence, to gather and ask them to go through RSPO certification process with out right benefit is time consuming and need main supporter which we cannot do it alone. The Thai Government is not very helpful either, let's be frank

**Commitments to CSPO uptake**

**As you don't source 100% CSPO through physical supply chains (IP/SG/MB), please answer the following questions: Do you have plans to?**

Yes

**Please specify:**

As explained earlier, Thai Palm Industry need out right benefit to show to small holders and need main supported to give knowledge about RSPO which we cannot do it alone. So we start step by step from our own plantation and slowly learning along the process before we can teach smallholders.

**7.1. Do you have plans to immediately cover the gap using Book & Claim?**

Yes

**How and when do you plan to immediately cover the gap using Book & Claim?**

--

**Concession Map**

**Do you agree to share your concession maps with the RSPO?**

No

**Please explain why: --**

**Challenges**

**1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

As explained earlier, Thai Palm Industry may be not in a fast pace like in Malaysia/Indonesia. We may have to start step by step form companies'own plantation and slowly learning good practices form the RSPO before we can teach small holders. No any Thai Government/no any Thai Palm Organization will do it. However, its more of a way of life that pass on form generations to generations NOT company to employee top-down, So its time consuming and deeper reach is needed. More, Thailand has CPOB which encourtage short sight benefit to sell loose fruit and lower the overall palm industry value.

---

**2 How would you qualify RSPO standards as compared to other parallel standards?**

--

---

**Cost Effective:**

No

---

**Robust:**

No

---

**Simpler to Comply to:**

No

---

**3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

We practice almost all of the above with education to farmers the hardest as they're not encouraged by benefits.

---

**4 Other information on palm oil (sustainability reports, policies, other public information)**

Need RSPO information and some promotion for knowledge by Thai Government Organization or provate organization.
