Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

it is always dealing with the contradiction between the sustainable practices vs. findings and realities on the ground which are published in the medias. therefore it is very difficult to clearly and credible communicate that palmoil is sustainable. even the certified palm is - in perception of our consumers - seen as difficult. Independent from this point of view we still face these contradictions and want to deal with them in the most transparent way by talking with our suppliers about transparency but also by starting projects on the ground. we remain comitted to the vision of more sustainable palm in connection with more traceability and transparency.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)
