3.4 Date expected to be using 100% RSPO certified sustainable palm oil and oil palm products from physical supply chains (Identity Preserved, Segregated and/or Mass Balance) in your own brand products

2017

Comment:

All of Campbell's operations globally were converted to 100% CSPO in 2016. However, we did have to utilize book and claim to offset a very small amount that was received from IOI Loders during their RSPO suspension.

3.5 In which markets where you operate do these commitments cover?

Australia, Denmark, Indonesia, Malaysia, United States

3.6 Does your company use RSPO certified sustainable palm oil and oil palm products in goods you manufacture on behalf of other companies?

No

3.7 Does your company have a Time-Bound Plan to only use RSPO certified sustainable palm oil and oil palm products in the goods you manufacture on behalf of other companies brands?

Yes

Trademark Related**4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?**

No

Please explain why

Our products have limited space available on the packaging and with increasing regulatory requirements such as Health Star ratings, Country of Origin labelling, GMO labelling and others we have no space for additional information. We include information on our Palm Oil commitments and sourcing on our website.

7.2 What best practice guidelines or information has your organization provided in the past year to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?

This past year, we published our global Palm Oil Sourcing Guidelines. In addition, to further our commitment to ensuring that all of the ingredients we source are done in an ethical and sustainable manner, we hired a Director of Procurement Corporate Responsibility who is responsible for building a global responsible sourcing program. This program includes oversight and implementation of our Palm Oil Sourcing Guidelines. In addition, this year, we published a more holistic set of supplier requirements in our Responsible Sourcing Supplier Code. This Code, which will be applicable to all of our suppliers globally is a supplement to our Supply Base Requirements and Expectations Manual and focuses on issues such as human rights, forced labor, child labor, environmental sustainability, business ethics and worker health and safety. This Code was recently published and will be rolled out to our suppliers in the upcoming months. The Code is currently available in English, but will also be translated to other languages consistent with our SBREM.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In the public domain, there is still a lot of misinformation around CSPO, and our Arnott's business has been working with the WWF on promoting better education around CSPO and the benefits. In addition, with the unexpected suspension of IOI Loder's RSPO Certification, we were forced to scramble to use book and claim to ensure that we met our 100% CSPO commitment. In some cases, such as this one, this was the only supplier who could supply us with the formulation we needed for a particular product so the only other option would have been shutting down production of an entire product line. Using book and claim allowed us to prevent that.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Arnott's has engaged with the Australian Food & Grocery Council (AFGC), WWF and activist groups to keep them updated on our progress to 100% CSPO. These parties have been invited to tour our factories to gain a better understanding of palm usage. We have also engaged with RAN. Further, we have worked with our suppliers to help them understand the importance of RSPO and are engaging with them on traceability.
