## Challenges

### 1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

As part of the production of crude palm oil and the supply of palm diets, we encounter several obstacles. At the economic level : - Competition; - Failure to comply with the rules issued by the oil palm sector in Côte d'Ivoire, resulting in the inability of industrialists to support producers in terms of agricultural advice, the rehabilitation of runways and the professionalization of cooperatives. At the social level : - The dispersal of our plantations throughout the South-Comoé region makes it difficult or even impossible to satisfy all these stakeholders, hence the dissatisfaction of these stakeholders; - Failure to comply with the contracts signed by our partners for the creation of the plans strongly hampers the supply of our plant in palm regimes; At the environmental level, our biggest constraint is the cost of conducting HVC studies for new plantations. Indeed, the very high cost of these HVC studies severely limits the acquisition of new land to the extent or in Côte d'Ivoire, it is no longer possible to have an area of ??more than 1,000 hectares of a single taking. As part of efforts to alleviate or resolve these problems, On the economic level, we try to lobby the oil palm sector for the implementation of regulatory texts related to the management of the sector. At the social level, we recently carried out a Social Impact Assessment (SIA) of our plantations (March 2017) and the results are being exploited for the implementation of the recommendations. At the environmental level, especially the constraint linked to the high cost of HCV studies, we believe that consideration should be given to the possibility of reducing costs according to the sensitivities of each country. Indeed, the very high cost of these HVC studies severely limits the acquisition of new land to the extent or in Côte d'Ivoire, it is no longer possible to have an area of ??more than 1,000 hectares of a single taking.
