Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Many of the CSPO and CSPKO based raw materials have still a limited availability on the market. This means also a restriction in the selection of raw material suppliers. We have intensified our dialogue with the suppliers to transfer more raw materials to MB quality and to get a better transparency of the supply chain.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are in constant discussions with our suppliers to promote the use of CSP(K)O and make progresses in switching more and more raw materials to MB quality. Besides we are frequently informing our customers concerning the status/content of CSP(K)O in their products.
