## Challenges

### **1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

Our main business is bar soap, mass consumption product, where price is the main driver. The higher cost of RSPO palm oil will leave us without the competitiveness required by the market. At Colombia and Ecuador some of RSPO principles have been fulfilled, but complete RSPO development has been limited.

---

### **2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

We only manufacture bar soaps from 100% vegetable base soap. We encourage our clients (third customers) the use of sustainable sources for the manufacturing of their bar soaps.
