Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Our main challenge will be to continue this education project in the long run with a very tight budget, due to some plantation partners still not adhering to our revised monthly contribution rate. Without the financial support from the plantations, HUMANA will have difficulty providing our education programs. We also need to work with all stakeholders on developing proper and clear guidelines with regards to permission from the Malaysian Ministry of Education on our education provision.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Humana had for the first time on 18th July, 2016 call for a meeting with all of the plantation's stakeholders. The main objective of the meeting was for us to know our plantations partner, and to introduce explain on operation and to introduce our committee members. In addition, we also shared with our key plantation stakeholders on the current progress and future plans of our society, and discussed and hear the stakeholder's views on any issues or suggestion to improve our education delivery. We emphasize to the stakeholder that education is also one of main and important criteria that looked into by the RSPO audit.
