Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have continued to find limited palm oil derivative materials available that are RSPO certified. Certification costs are also very expensive. It is also difficult to source commitment to RSPO certified palm oil for manufactures who have high palm oil percentage ingredients with high usage amount.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Mostly just business to business education as we continue to promote the use of palm oil in all our products to our customers. We undertake a refresher course with our staff annually to help them understand the benefits of us using sustainable palm oil in the manufacture of our products - hopefully this flows out in the community.
