this is because it is capital intensive and the company is not in good financial standing

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

our major challenge is that most of the fruit we use are from private individuals and getting them certified is expensive. the company itself is not financially sound to be able to do all the environmental monitoring it is supposed to do. we are sourcing for funds and we believe that when we get funds, we will be able to meet those stands and get certified.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

engagement with key stakeholders, business to business education. we partake in conferences and workshops organized in the country.
