Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Our customers (feed compounders) are working in a "no-margin" environment due to the current crisis in pigs and cattle breeding ; they cannot afford to pay any RSPO premium (B&C, MB or CSPO) because their own customers cannot pay for it. That is the reason why it is necessary to promote RSPO towards final customers, in order to create the demand and to make CSPO the standard for palm oil. Our strategy is to improve palm oil image in the french population in order to make them switch from "no palm oil" to "sustainable palm oil ". We already source 100% of our palm oil from international traders and producers who have implemented No Deforestation, no Peat, no Exploitation Policy (NDPE).

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)
