## Challenges

### **1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

Nowadays less than 3 pct of certified material available in Thailand for trading and we are unable to import palm oil due to tax tariff. Hence, only opportunity for support CSPO is from local sources which is a very big challenge for our country. Therefore, we are still looking for opportunity for supporting smallholders to achieve certification with more commercial scale.

---

### **2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

We actively communicate with our suppliers/consumers on our support to RSPO through B2B education. Furthermore, we continuously uptaking CSPO in the market to support on marketing RSPO derivatives to the market for trading physically which will be sustainable in long term for CSPO products.
