#### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Market is not really eager to switch to a more expensive palm oil alternative. Most of our competitors are not offering the RSPO option.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As a private label producer we follow the sales model and strategy of our customers (we produce in their brand). However, if they want to go for RSPO, we try to limit the % palm oil in our final product. The less palm oil we consume per kg of the end product, the less the extra cost will be to switch our customers to RSPO.
