LATE SUBMISSION

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The biggest issue in some markets is the price. So in general customers are not initiating the use of RSPO or Mass Balance or Segregation products because they are very tight on the budget already. Lately we get more and more requests about these products, because producers would like to use the additional statements on the product packaging, but as they hear about the influence on the price they decide to stick with regular ones.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Every time while visiting customers, with a supplier or alone the sales person is presenting and speaking about RSPO importance, why is it present and that we are able to provide such product if it would be necessary. Even if the customer was asked already before, we ask every time if there is a new request about RSPO. We always represent possibilities how it would be possible to get this certification and what additional value customer or producer would have.
