## Trademark Related

**4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?**

No

**Please explain why**

The majority of our products are manufactured for a retailer under their brand. Our customer has set targets to change over to MB RSPO on all raw materials / fats / components.

Our products are quite complex and it is better to monitor the change over in MB RSPO on the various raw materials / fats / components rather than identifying on individual products.

Internal training documents on RSPO palm oil.

## Challenges

**1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

It appears that MB RSPO is becoming slightly more affordable which has assisted with the change over process.

---

**2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

It is encouraging that vegetable fat manufacturers are starting envisage MB RSPO as the "normal" palm oil. The change over needs to be driven by the fat manufacturers to ensure that the demand for sustainable palm oil continues to grow. It is important that training is provided to colleagues in the food industry to request MB RSPO palm oils as a minimum.
