Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Throughout 2017, the UK experience extreme fluctuations in the USD /GBP currency exchange rate. This put significant pressure on raw-material prices for manufacturers and retailers. We are trying to work together to try to ensure adherence to their time-bound RSPO policies (where relevant) but changes in cost prices can make it difficult to ensure margin protection and sustainability for all.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are a small organisation with no spare resource. We do believe in the importance of protecting our future generations and therefore we work closely with our in-house teams and customers to educate individuals on RSPO.
