## Challenges

### **1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

Involvement of new sectors and countries has shown to be rather complex. Therefore we put a lot of effort in engagement and outreach in cooperation with other EU stakeholders. We would like to build on what currently exists and try to find cross-national linkages. A key element in this is also insight in use of CSPO in Europe. We plan to continue work related to this with RSPO in the coming period.

---

### **2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

We support and fund activities on sustainable palm oil in several EU countries via the ESPO project (together with IDH and EPOA). We organize, together with EPOA, meetings and conference on the role of palm oil and necessity of sustainability. We work together with Dutch ministry of Foreign and Economic Affairs to create support for sustainable palm oil, also to other EU countries. We work together with ESPOAG members in create support for sustainable palm oil in EC and EP. As MVO, information and communication on sustainable palm oil to various stakeholders: NGO, business, government is part of our day to day work.
