**Time-Bound Plan****4.1 Year of first RSPO P&C certification (planned or achieved)**

2019

**Comment:**

Certification audit planned for PT HIP, Sorong Regency for 2019, including smallholder (plasma area).

The LUCA of PT HIP has marked pass and currently in concept note preparation. RSPO highly recommend that the initial audit should wait until the concept note has been endorsed by the Compensation Panel. This will give PT HIP one year to complete the RaCP process, which mean the compensation plan endorsement.

**4.2 Year expected to achieve 100% RSPO certification of estates**

2020

**If target has not been met, please explain why:**

Mill construction at PT PAL, Mimika Regency, is planned for 2018 with production in 2019. ISPO and RSPO certification planned for 2020.

**4.3 Year expected to achieve 100% RSPO certification of scheme/associated smallholders and outgrowers**

2020

**If target has not been met, please explain why:**

Smallholder areas are operated as an integral part of the group operations making it possible to do certification at the same time as for the group.

**4.4 Year expected to achieve 100% RSPO certification of independently sourced FFB****If target has not been met, please explain why:**

At this stage we do not have independently sourced of FFBs at any of our operations

**Concession Map****5.1 With regards to RSPO General Assembly resolution 6g that calls for members to submit maps of their concessions by ACOP deadline, please upload your estate location concession map(s) in Shapefile format here:**

-

**5.2 Map data declaration****Please state if any concession sites have been recently acquired or if any concession sites have changed ownership since the previous ACOP submission**

Noble Plantations entered into the palm oil business as a grower in June 2010 by acquiring a controlling share in PT Henrison Inti Persada (PT HIP) in the Sorong Regency, West Papua Province. PT HIP is developing a plantation with a landbank of 32,546.30 ha.

During 2013, Noble Plantations began development at PT Pusaka Agro Lestari (PT PAL) in the Mimika Regency, in Papua Province. PT PAL has a landbank of 38,159.60 ha.

Thus, the total landbank of Noble Plantations is more than 70,705.90 ha.

## Challenges

**1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

It is more difficult to produce CSPO in remote province like West Papua and Papua due to the lack of exposure to best practices, lack of facilities and low education levels of local population. We are mitigating by implementing a community based conservation plan as well as very regular briefings and training to our employees where as far as possible sourced locally.

---

**2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

As we are a grower producing CPO our answer here similar as answer for 7.1: - Making all our stakeholders (employees, customers, government authorities and shareholders) aware of our commitment to RSPO by actively transforming our operations to be compliant. - Currently we only trade with RSPO members and have regular discussions on how to grow our business using RSPO certification as competitive advantage.
