7.2 What best practice guidelines or information has your organization provided in the past year to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?

Comment:

We have internal guidelines for the work in Progress to move to as much as possible CSPO. This includes on how we approach our suppliers to provide CSPO.

7.3 Your answers above indicate that you are not yet using 100% RSPO certified palm oil and oil palm products. Do you have plans to immediately cover the gap using Book & Claim?

No

Please explain why

We used only 65 t of non-certified Palm oil and Palm oil products in 2017 and we are reducing this further. We do not want to add the administrative burdon for Book&Claim for this little residual quantity.

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please explain why

We are currently preparing our CSR Report and this will include GHG reporting.

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

It took longer than expected for our suppliers to change to segregated palm oil, mostly for specialist compound ingredients where Palm oil is a minor component.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We communicated to our suppliers about the RSPO and our plan to move to CSPO. A few suppliers were not aware of RSPO and we convinced these suppliers to move to CSPO as soon as reasonably possible.
