**Time-Bound Plan**

4.1 Year of first RSPO P&C certification (planned or achieved)
2012

**Comment:**
PT Unggul Lestari was certified on 04 September 2012. In 2015, PT UL has conducted GHG assessment in compliance with Criterion 7.8 of RSPO P&C. PT UL has successfully gone through RSPO Recertification on 08 August 2017

4.2 Year expected to achieve 100% RSPO certification of estates
2012

4.3 Year expected to achieve 100% RSPO certification of scheme/associated smallholders and outgrowers
2017

**If target has not been met, please explain why:**
The company looks at possible ways to extend its innovation by also including smallholders where possible (compliance to RSPO). PT UL has assisted 2 villages to develop Village Oil Palm Development Project (Kas Desa), each with 10 Ha for CSR project. The Kas Desa has obtained RSPO certification in 2017.

4.4 Year expected to achieve 100% RSPO certification of independently sourced FFB

**If target has not been met, please explain why:**
PT UL do not receive FFB from independent source.

**Concession Map**

5.1 With regards to RSPO General Assembly resolution 6g that calls for members to submit maps of their concessions by ACOP deadline, please upload your estate location concession map(s) in Shapefile format here:

-  

5.2 Map data declaration

**GHG Footprint**

6.1 Are you currently assessing your operational GHG footprints using other tools/methodology(s) than RSPO PalmGHG Calculator?
No

6.1.2.1 How many management unit is currently reporting its GHG footprint using RSPO PalmGHG Calculator?
1

6.1.2.2 What is the average GHG footprint by hectare (tCO2e/ha) and by tonne of Crude Palm Oil (tCO2e/tCPO) of reporting management units?

| GHG footprint by hectare (tCO2e/ha) | 2.59 |
| GHG footprint by tonne of Crude Palm Oil (tCO2e/tCPO) | 0.37 |

6.1.2.3 What would the key emissions sources of reporting management unit?
Fertilizer, N2O

**Actions for Next Reporting Period**
7.1 Outline actions that you will take in the coming year to advance your plans for certification
The implementation of sustainability within the organisation is driven by Continuous Improvement process. At this moment all existing mills are certified. But inclusion of independent outgrowers is an important part of the focus of the group.

7.2 Outline actions that you will take in the coming year to promote CSPO along the supply chain
1. The company is looking at innovative ways to also address continious improvement. The company has implemented the Methane Capture and supply electricity to workers housing complex. Company’s efforts to minimize GHG emission can be found at http://www.musimmas.com/sustainability/environmental-protection/emissions-reduction.
2. The organisation undertook to establish a transparent and accountable grievance system as a platform for stakeholders to inform us of issues in our supply chain. The grievance mechanism will provide a systematic and fair approach in the treatment of grievances from the point of receiving the complaints. The platform is accessible to all stakeholders through http://www.musimmas.com/sustainability/grievance.
3. Active participation in various multi stakeholder platforms to broaden our efforts to create a sustainable supply chain, such as Decent Rural Living Initiative, Fire Free Alliance, PONGO Alliance, SEA Alliance for Sustainable Palm Oil, Tropical Forest Alliance 2020. More information on our stakeholders collaborations can be found at http://www.musimmas.com/sustainability/stakeholder-collaboration.
4. The organisation has started project with IFC to develop a group certification mechanism to help the outgrowers to be certified and be an independent certified smallholder group. Updates on the project can be accessed through http://www.musimmas.com/sustainability/smallholders.

Reasons for Non-Disclosure of Information

8.1 If you have not disclosed any of the above information, please indicate the reasons why

Support Smallholders

9.1 Are you currently supporting any independent smallholder groups?
Yes

9.2 How are you supporting them?
The company is looking at including more smallholders into supply chain. Beside being fully IP certified with including smallholders in the certification process, the company also looks at a program to extend to independent smallholders and outgrowers. The IPODS program is a program in cooperation with IFC and is targetting independent farmers to be included into the supply chain and certified evently. Updates on the project can be accessed through http://www.musimmas.com/sustainability/smallholders.
Challenges

1. What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The cost of certification is rather high compared to the uptake in the market place. The involved procedure and additional requirements do bring more cost. Company is committed to CSPO production and also has developed its own policy to extend this. Still the RSPO could play a role in international setting to promote CSPO and need to increase the uptake.

2. In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Company has been very active in extending its policy to their suppliers and has engaged with different stakeholders on the importance of CSPO. It has been proactive in the market place with buyers. It also is engaging on different programs in the field and is active in many discussion groups on HCS, smallholders, GHG, human rights, RSPO P&C revision Task Force etc.
