Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

CSPO products are more expensive revatively to no CSPO products and this has a negative affect to the production cost. Although, because of both environmental reasons and specific customers demands we intend to use CSPO.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Together with our customers we are trying to support the need in the use of CSPO products.
