Actions for Next Reporting Period

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

For the current and coming year, we will intensify our suppliers engagement program to influence our suppliers to operate in accordance to our sustainability policy and RSPO best practices. We have been actively collecting FFB traceability data of our suppliers since early of 2016 and we will explore with our 3rd party consultant and suppliers to build a more effective procedure in achieving full traceability to our supply chain by 2020. In order to promote a more demanding market for certified palm oil and products, we are having more dialogues with our buyers on risk-free products that we are able to produce by committing in sustainable palm oil.

7.2 What best practice guidelines or information has your organization provided in the past year to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?

Apical has the sourcing policy and engagement program to facilitate adoption of RSPO standards and requirements that is consistent with market demand for RSPO certified palm oil. We also have the sustainability policy which we constantly refer to in engaging with our buyers on policy compliance and uptake of sustainable palm oil. The guidelines and documents are available in english as a commonly used language in most of our buyer markets.

--

Support for Smallholders**9.1 Are you currently supporting any independent smallholder groups?**

Yes

Please state the markets where you intend to apply the Trademark and when you plan to start

We are collaborating with our buyers and consultant to carry-out a project to improve the livelihood and resilient of some of the independent smallholder groups supplying to our supplying mills. This including but not limited to exploring alternative means to enhance their socio-economy condition and also helping the smallholders to optimize their oil palm production through training of good agricultural practices.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

One of the main challenges in the promotion of CSPO is to convince our suppliers on tangible benefits from committing in RSPO certification. In order to create an encouraging environment for the whole palm oil supply chain, the players in CSPO market has to ensure equal distribution of benefits from producing and selling CSPO.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As a processor and trader, we believe continuous engagement with different level of stakeholders in the supply chain is one of the most effective ways to transform the market. We have been continuously engaging with various stakeholders to explore the challenges and opportunities of CSPO market, communicate the most recent requirements and to promote sustainable good practices to our palm oil suppliers through workshops and trainings.
