#### Other:

ANJA has been a RSPO member since 2007. We have promoted the production of CSPO through dialogue/stakeholder meetings where we have convinced our Kemitraan cooperatives and other stakeholders to take the RSPO route. The delays and the waiting time to comply the various criteria of the various RSPO procedures most often don't go well with the farmers and various cooperatives. This was quite demanding nevertheless we persevered and got it through. In the true spirit of RSPO we monitor and manage the biodiversity of all our concession areas and in one case we haven taken the moral responsibility to engage with conservation bodies to manage green areas which are not in our direct authority or jurisdiction. We engage a number of consultants to assist and provide inputs how to get communities more involved in the production of CSPO. We have also initiated a sustainability obligation for all our vendors and contractors. We are now also engaging with refineries to address the issues on the uptake of CSPO as many of the refineries are NDPE signatories which does not go well for RSPO member Groups.
