**4. TimeBound Plan****4.1 Which year did your company achieve (or plans to achieve) its first RSPO P&C certification?**

2011

**4.2 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all its estates and mills?**

2011

**4.2.1 If the previous target year for G.4.2 has not been met, please explain why**

The target was achieved.

**4.3 Which year did your company achieve (or plans to achieve) 100% RSPO certification of scheme smallholders?**

2014

**4.3.1 If the previous target year for G.4.3 has not been met, please explain why**

The target was achieved. In 2014 Agropalma Group has achieved RSPO certification to all its FFB suppliers. However, after run a LUCA analysis (in 2015), Agropalma found that one of its current schemed suppliers had liabilities, according the rules of RSPO Remediation and Compensation Procedures. So, farmer was suspended from RSPO Certification. Together with the supplier company has been running a Remediation and Compensation process within RSPO, since 2015. In 2019, RSPO has approved the proposal for compensation and this supplier was re-included in the certified supply base. Other important issue is the fact that few new FFB farmers are becoming part of Agropalma supply base. They start as independent suppliers and if they perform well in terms of production, labor and environmental management, they will be able to be integrated as schemed suppliers. Everytime this happens, these farmers will require a certain time to prepare themselves and obtain RSPO certification. In 2022 few of these suppliers were included in the RSPO audit and got the certification status. Therefore, in 2022 all schemed suppliers has achieved certification. However, due the dynamic nature of Agropalma supply base (we are always seeking to engage with new suppliers), it is not possible to establish a fix deadline. 2014 was registered just because the ACOP system requires a date.

**4.4 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all FFB, regardless of source?**

2014

**4.4.1 If the previous target year for G.4.4 has not been met, please explain why**

## Challenges and Support

### 1.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- ☒ Awareness of RSPO in the market
- ☐ Difficulties in the certification process
- ☐ Certification of smallholders
- ☒ Competition with non-RSPO members
- ☐ High costs in achieving or adhering to certification
- ☐ Human rights issues
- ☒ Insufficient demand for RSPO-certified palm oil
- ☐ Low usage of palm oil
- ☐ Reputation of palm oil in the market
- ☐ Reputation of RSPO in the market
- ☐ Supply issues
- ☐ Traceability issues
- ☐ No challenges faced
- ☒ Others

#### Others

The main obstacles are placed in demand side of the supply chain. As most of Agropalma clients are placed in Brazil, where the demand for Sustainable Palm Products is still low (but increasing). International clients (especially Europeans) are more interested and already buy significant amounts of certified products from Agropalma. A special challenge refers to multinational companies that delay to apply their global sourcing policies related do RSPO in Brazil.

To increase demand in internal market Agropalma always promote RSPO and explain the issues and concerns related with sustainability of palm oil production worldwide to consumer companies in Brazil.

Other important challenge is the fact that some RSPO members claim that they are certified and offer certified palm products in the market, while they are really not certified. This situation confuse market operators and undermine the credibility of RSPO Certification and RSPO Organization.

In 2020 and again in 2021 Agropalma reported such a case to the RSPO secretariat, unfortunately the situation has not changed.

**1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?**

- ☒ Communication and/or engagement to transform the negative perception of palm oil
- ☒ Engagement with business partners or consumers on the use of CSPO
- ☐ Engagement with government agencies
- ☒ Engagement with peers and clients
- ☒ Promotion of CSPO through off product claims
- ☒ Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- ☒ Promotion of physical CSPO
- ☐ Providing funding or support for CSPO development efforts
- ☐ Research & Development support
- ☒ Stakeholder engagement
- ☐ No actions taken
