¿Qué es la quantité de carburant utilisée à l'Äusine?
¿Mis en fonctionnement de groupes électrogènes pendant les temps d'arrêt?
¿Véhicules de l'Äusine - chargeuses, chariots élévateurs, etc.
¿Qué es la cuantía d'Äefluent produite?
¿Comment l'Äefluent est-il traité?

☐ Reputation of RSPO in the market
☐ Supply issues
☐ Traceability issues
☐ Others
Other:

As an independent oil mill, the major challenges we face in the production of certified palm oil are undoubtedly the commitment of small independent producers to the RSPO certification program. Until the national interpretation is validated and strong actions are taken in favor of RSPO certification in our country, in which there is no market constraint to engage in this process, the choice of small independent producers to engage in a binding approach is not the most appropriate remedy. In order to get small producers to join our certification program, we are obliged to play on the purchase price of the raw material.

10.2 In addition to the actions already reported in this ACOP, how has your organisation supported the vision of RSPO to transform markets in other ways?

- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Promotion of CSPO outside of RSPO venues eg trade workshops industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- Others

Other:

As mentioned above, we have engaged small independent producers in the RSPO certification process through awareness-raising actions and assumption of responsibility for the entire certification program. In addition, we support the national project piloted by the NGO Solidaridad to proceed to the certification of 5000 producers by 2020 at the technical and financial level.

10.3 Please attach or add links to any other information from your organisation on your policies and actions on palm oil.
