1. Operational Profile

1.1 What are the main activities of your organisation?

PT Gagas Dinamiga Aksenta (well known as Aksenta) is a social-environmental consultancy company whose main objective is to assist companies, NGOs, and governments in achieving and having a good understanding of their environmental and social sustainability goal, with sufficient knowledge, skill, and attitude to improve its social relations and ecological management to become environmentally and socially sustainable. Related to RSPO, Aksenta provides its services including independent assessment, facilitating, coaching, training, technical assistance, and consultancy with RSPO certification, audit, document review, preparation of SOPs and guidelines, due diligence studies, research, HCV-HCS integrated/HCV and HCSA only assessment, Social Impact Assessment (SIA), Land Use Change Analysis (LUCA), Remote Sensing and GIS, Carbon Stock Assessment (CSA), Green House Gas study, complaint verification, soil suitability studies, wildlife management, human-wildlife conflict mitigation, HCV and Social management plan, developing remediation and compensation concept notes and remediation compensation plan preparation, including assisting the compensation/conservation program.

1.2 What activities has your organisation undertaken to promote sustainable palm oil, the RSPO and/or RSPO members in the reporting period?

The main activities undertaken in 2023 are to promote sustainability in palm oil development, including:

1. Integrated HCV-HCS assessments for an RSPO member oil palm grower: New Planting Procedures and existing oil palm plantation. Part of the project related to HCV is delineating existing HCV areas.
 2. Integrated HCV-HCS assessment for a non-member: palm oil companies interested in joining RSPO, palm oil companies willing to comply with NDPE,
 3. HCV-HCS Integrated assessment for a non-member that is willing to comply with NDPE,
 4. Social Management Projects including Social Impact Assessment, Social Liability Identification, Participatory Mapping, Land Tenure Study, FPIC, and Multi-stakeholder Engagement.
 5. Remediation and compensation-related projects. Several projects related to remediation and compensation have been carried out. These projects consist of conducting liability assessment through Land Use Change Analysis (LUCA), verifying remediation area, reviewing LUCA reports, developing compensation Concept Notes, developing Compensation and Remediation Plans, preliminary study for choosing compensation program areas, facilitating conservation collaboration between RSPO grower members and NGO partners for planning and implementing the compensation program. Currently we are implementing two conservation programs from two different companies. And assisting two other companies in preparing compensation plan documents.
 6. Due diligence in assessing potential conservation and development areas for a non-member. This project was taken as a precautionary action by the palm oil company before acquiring other oil palm plantations. Equip the corporation with comprehensive knowledge about the potential development and conservation area. Helping identify the acquired areas of the entity that will assume ownership of a specific plantation.
