2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership

In the reporting year FY2023 the ownership of the joint venture has changed and is now fully owned by Lamb Weston Holdings Inc. This includes all our six sites in Europe and meas we are now 100% owned by Lamb Weston Holdings Inc. This will be the last time that we do a separate ACOP reporting, as we will be part of LW Inc's report in the future.

- Only our sites in the Netherlands and our site in the UK (Wisbech) are using refined palm oil or palm oil derivates. Our site in Austria (Hollabrunn) does not use any palm oil

- Refined palm oil is used for production of frozen parfried potato products for Private Label customers only, not for any own brand labels (Lamb Weston), produced in Europe.

- One specific palm oil derivate (ascorbic palmitate) has been used in 2019 as additive at very minor quantities (< 0.01%) in the production of dehydrated potato flakes at 3 of our 4 Dutch production sites and at our site in the UK (Wisbech). This concerns as well LW branded potato flakes as Private Label brands

Europe ,Latin America ,Rest of the World

DL.2.0 In order to facilitate ease of reporting and transparency, RSPO members operating within the palm oil demand supply chain can now choose to report palm oil and palm oil product volumes on:

We have phased out palm since 2012 as our main frying oil for health reasons. Palm oil contains 50% saturated fat versus typically only 10-12% (oil based) in sunflower or rapeseed oil. Palm oil also contains relatively high levels of the process contaminants 2,3-MCPD esters and glycidyl esters, which are another health concern. Next to this palm oil is linked to deforestation and one of the key ingredients where companies have a legal obligation to proof that they are sourced deforestation-free.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.
