Bayer's net-zero deforestation as well as the human rights commitment along the value chain includes the ambition to source sustainable palm (kernel) oil and soy derivatives. Bayer believes in sustainable value chains with the focus on sustainable production, transparency, traceability and certification. Our activities are aligned with the elements of the Accountability Framework. We collaborate with our partners and suppliers to further decrease our environmental footprint and set social and ethical standards.

In terms of sustainable palm oil, we support the certified sustainable production of these raw materials as a purchaser of plant oil derivatives, which is especially important in Southeast Asia but also other regions. We are member of the "Roundtable on Sustainable Palm Oil" (RSPO), and since 2017 we are buying RSPO credits according to the quantities we use. In 2021, Bayer has decided to move from the RSOP credit system towards the RSPO Supply Chain Certification, the RSPO Mass Balance Certification. We understand the complexity of our value chains and the lack of availability for certified palm oil derivative, therefore we targeted to achieve almost 100% certified sustainable palm (kernel) oil by 2027. In 2023 we reached 30%. We invite all stakeholders to follow and support in this process.
