This may include your usage of RSPO Credits to cover gaps in certified uptake, changes due to business environment, variations due to stock positions or efforts to support independent smallholders beyond volume commitments.

On an annual basis, we purchase RSPO credits to ensure that 100% of our palm-based materials, including derivatives, are certified. Since consolidating the Lifestyles Business and Professional business into our corporate account, we continue to see a YOY increase in using palm. Now that we have three years of reporting in this new structure, the year over year data for 2022 and 2023 is a better indicator of actual changes in consumption. Additionally, for the past two years we have begun purchasing our credits from independent smallholders to better support the growth of certified palm production. Nearly 64% of our credit purchases for 2023 were made with independent smallholders

2.6 Please estimate the regional sales volume distribution of your company's RSPO certified palm oil, palm kernel oil and related products (as declared in Question 2.4) in the following countries/regions:

In the meantime, we will continue to purchase book and claim credits to cover any gaps. Additionally, this is our second year purchasing IS-CPO and IS-CPKO credits from independent small holders to further support the growth of certified palm oil production. For 2023, credits purchased from independent smallholders account for approximately 64% of our total credit purchases.

SC Johnson uses relatively small amounts of palm oil, palm kernel expeller, or derivatives, but we recognize the impact that non-sustainable palm oil production has on the planet and our responsibility to future generations. As a result, we have placed non-sustainable palm oil on our restricted-use material list. Restricted use materials cannot be used in our products or can only be used with approval by senior management with agreed-upon exit dates.

Additionally, SC Johnson renewed its efforts to define our baseline usage for palm oil and palm oil derivatives in 2021. This new baseline includes recent acquisitions since 2015 and is inclusive of all business units under the SC Johnson corporate structure. In addition to the new baseline, we updated our policy, have developed a five-year strategy, and created glide paths to achieve our five-year targets. To enable the goals we set, we continue to work directly with our suppliers, stakeholders, and partners.

The commitments below will guide our business as we progress on our journey. To achieve these goals, SC Johnson:

- Requires suppliers to sign our Code of Conduct & our deforestation policy
- Consider the full lifecycle impacts as well as impacts to biodiversity and the environment related to ingredient & fiber choices
- Eliminate product inputs from controversial sources by partnering with suppliers that commit to no new development of High Conservation Value (HCV) Areas, High Carbon Stock (HCS) areas and/or peatlands of any depth
- Ensure that our suppliers respect and adhere to the principles of Free, Prior and Informed Consent (FPIC) of indigenous people and local communities for all new plantation developments
- Continually review and revise policies and practices to increase supply chain sustainability
- Engage suppliers in discussions and review of their production and sourcing practices to measure and track progress
- Suspend or eliminate purchases from any supplier that it is intentionally contributing to deforestation or the negative environmental or social issues or impacts created by their production practices. SC Johnson's deforestation initiatives are mostly focused on pulp, paper, palm oil/derivatives, and soy but we also monitor other ingredients that are naturally derived.

Pulp & Paper

- Utilize virgin fiber only from sustainably managed sources (i.e. approved global forestry certification schemes)
- Source 100% of pulp, paper, and packaging components from recycled material or certified virgin fiber
- Optimize our packaging in order to minimize our environmental impact

Palm Oil

- Utilize RSPO segregated or identity-preserved palm oil (PO) when we using palm oil as a direct ingredient
- Increase the use of RSPO mass balance palm oil to 100% for PO derivatives
- For PO purchases, at a minimum, trace the origin of supply to the mill, however, in most direct use cases we trace to the plantation level

Soy Oil

- Ensure we understand the feedstock origin and confirm the supply is sourced sustainably and not from a high-risk region

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.
