Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.

Challenges and Support

1.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

High costs in achieving or adhering to certification - Cost of RSPO certified palm oil is linked to market supply and demand so Reckitt's ability to influence market pricing is limited. We are collaborating with the wider industry to promote greater uptake of RSPO certified palm oil across the industry, which should result in an increased supply over time.

Traceability - the majority of the palm oil sourced are derivatives and come from highly complex global supply chains. Achieving traceability to plantation for our derivative supply chain continues to be a challenge; we are engaging our derivatives suppliers through Action for Sustainable Derivatives to improve traceability.

Low usage of palm - We are relatively small user of palm oil with over the majority of the palm oil sourced in the form of derivatives - this limits our leverage over individual suppliers to enact change so we also seek to drive change through sectoral approaches such as through the Consumer Goods Forum Human Rights and Forest Positive coalitions.

Human Rights issues - Having a scalable way to assess/address human right issues at every mill and plantation throughout our palm oil supply chain is a challenge. We are driving much of our activity through sectoral approaches such as through the Consumer Goods Forum Human Rights and Forest Positive coalitions along with investment in landscape programmes which tackle these issues. In 2022 we launched our grievance procedure and have made our grievance log public.

1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
- Others

Others

Industry collaboration – We are active members of the Consumer Goods Forum’s Forest Positive and Human Rights Coalitions of Action to remove deforestation and forced labour from our collective supply chains. This group is engaging key palm oil suppliers to develop and deploy a human rights due diligence system from refinery to plantation.
