2. Palm Oil and Certified Sustainable Palm Oil Consumption

Information in Section 2.0 - Palm Oil and Certified Sustainable Palm Oil Consumption - is a mandatory declaration in your ACOP. This includes volume data on palm oil, palm kernel oil and related products consumed, to enable the RSPO to accurately calculate uptake of individual members, sectors and RSPO members as a whole. ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

2.1 Please list down all operations and subsidiaries using palm oil, palm kernel oil and related products that are owned and/or managed by the member, including those under Group Membership

Persano Group A/S, Skaaremsevej 11-14, 3220 Græsted, Denmark

2.1.1 In which markets does your company sell goods with palm oil and oil palm products?

Europe

DL.2.0 In order to facilitate ease of reporting and transparency, RSPO members operating within the palm oil demand supply chain can now choose to report palm oil and palm oil product volumes on:

an aggregate level (as in previous ACOP reporting cycles)

2.2 Total volume of RSPO-certified (IP, MB, SG and RSPO Credits/Book and Claim) and Non RSPO-certified palm oil, palm kernel oil and related products purchased for use in your company's own-brand and third-party brand products

Total	448.20

2.2.1 Please estimate the percentage of derivatives and fractions (reported in Question CG.2.2) derived from palm oil or from palm kernel oil. The default split for volumes is assumed to be 80% palm oil-based derivatives and 20% palm kernel oil-based derivatives.

Description	Percentage
Palm oil-based derivatives and fractions	61
Palm kernel oil-based derivatives and fractions	39

2.5 According to the volume information you have provided in Question 2.2 and Question 2.4, your company's certified palm oil and palm oil products uptake is:

88.58%

2.5.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake. This may include your usage of RSPO Credits to cover gaps in certified uptake, changes due to business environment, variations due to stock positions or efforts to support independent smallholders beyond volume commitments.

As a private label producer, we do not plan ourselves which products to produce -it is entirely due to demand. Also, ingredient selection is not entirely up to us - we also need to take numerous factors into account before selecting ingredients.

2.6 Please estimate the regional sales volume distribution of your company's RSPO certified palm oil, palm kernel oil and related products (as declared in Question 2.4) in the following countries/regions:

We are participating in the Danish Alliance for sustainable palm oil - a group across sectors in Denmark.

Working on:

Rise awareness in consumers in regards to palm oil and sustainability. In Denmark, the conscious consumers still think palm-free is the most sustainable.

How to support small holders is another hot topic, especially with the EUDR coming up.

Shared Responsibility

The Board of Governors of the Roundtable on Sustainable Palm Oil approved new Shared Responsibility rules on 31 October 2019, requiring all members to share sustainability requirements and obligations. Reporting of Shared Responsibility (SR) requirements will be done through ACOP and MyRSPO. As the process of verification of the reports is in development, the Shared Responsibility section in ACOP may change in future ACOP cycles. Evidence to show compliance to the SR requirements shall be uploaded via your membership profile in MyRSPO. Please login to your MyRSPO account and upload the relevant policies, plans and relevant reports there. If you do not have a policy or your policy does not cover all items, you will be required to provide a Declaration of Support for the relevant policy items in your MyRSPO profile. Additional information on the required policies and plans applicable to all sectors as well as the annual uptake targets for supply chain actors can be found on <https://rspo.org/members/shared-responsibility> or email the Shared Responsibility team at sharedresponsibility@rspo.org.

If I calculate correctly, we reach our uptake volume for CSPKO, but not CSPO.

In order to reach the CSPO target volume, we would need to buy more material based on PO - not only to increase the percentage, since our target volume is 105,8%. We have reached a level, where it is difficult since we only buy derivatives.

Challenges and Support

1.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

Consumers are not really aware nor demanding products with trademark on. We sell very few products as certified compared to the volumes bought - but for us the importance of buying is bigger than selling.

But the price difference is getting more and more of an issue with the purchasing department asking if it really is necessary eg. Glycerin will be an issue with EUDR where it is easier and cheaper to buy Glycerin based on other oil crops.

EUDR is also going to be of interest to see - as a smaller company, we are really hoping for RSPO to come up with a solution.

1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
- Others

Others

Through Danish Association for sustainable palm oil, we are engaged to promote sustainable awareness.

Also, we have clients buying certified products but without the Trademark logo, but where they are promoting it on their homepage (not space enough left for the Trademark logo on the physical product).

Talked about EUDR and certification at a meeting arranged for the cosmetic industry in Denmark by trade organisations and the authorities.
