1.58%

**2.4.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake calculated in PT.2.4. This may include changes due to business environment, evolving nature of operations or variations due to stock positions**

We can see that volume of certified palm has increased a little with the awareness of ESG and consumers as well. However, the unprecedented palm price premium over the other soft oils makes the volume amplified impossible in 2024. We anticipate that palm price " premium " returns to " discount " will be help.

### 3. TimeBound Plan

**3.1 Which year did your company achieve (or expects to achieve) the RSPO supply chain certification or RSPO trader/distributor licence?**

2018

**3.2 Which year did your company start (or expect to start) to source any RSPO-certified palm oil and oil palm products?**

2019

**3.2.1 If the previous target year has not been met, please explain why.**

Most customers are now having the sense of climate change. However, as explained earlier that certified palm will meet resistance from price-sensitive customers, particularly palm price has had a very high premium over the other soft oils. Hopefully, the said premium will be reversed in 2025!

**3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why**

As stated previously, we are in the hope palm price premium over other soft oils can be reversed to " discount " by way of demand rationing and supply increasing. This, will certainly escalate the sales of certified palm.
