ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.

As our raw materials are palm oil derivatives, we need our suppliers to have the certified material in their portfolio. In the case that the supplier doesn't provide this grade, we have to request them to include it there, or we have to study another option. If the option is to change to another material, the process is complicated, because the change can affect the end product. To increase the use of certificated raw materials, the organization has to make an economical effort due to the prices of that option.

1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- ☐ Communication and/or engagement to transform the negative perception of palm oil
