- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members

- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

Currently, certification has various national interpretations that seemingly facilitate compliance with standards in countries with low maturity in health, safety, environment, and human rights issues, such as in Asian countries. However, this only widens the gap in production costs between Brazil and other producing countries. We believe that countries like Brazil, which produce sustainably even without certification, i.e., have stringent legal requirements regarding governance, environment, and social issues, could benefit from a better position in the market if competed in equal bases.

1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
- Others

Others

In 2023, we made progress regarding the RSPO topic. We executed action plans aimed at developing more sustainable practices that aligned with RSPO indicators.
