4. TimeBound Plan

4.1 Which year did your company achieve (or plans to achieve) its first RSPO P&C certification?

2011

4.2 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all its estates and mills?

2011

4.2.1 If the previous target year for G.4.2 has not been met, please explain why

Target was achieved. However, company is facing some difficult challenges related to land disputes, what resulted in two suspensions of our certificate in 2023.

4.3 Which year did your company achieve (or plans to achieve) 100% RSPO certification of scheme smallholders?

2014

4.3.1 If the previous target year for G.4.3 has not been met, please explain why

The target was achieved. However, company is facing some difficult challenges related to land land disputes, what resulted in two suspensions of our certificate in 2023.

4.4 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all FFB, regardless of source?

2014

4.4.1 If the previous target year for G.4.4 has not been met, please explain why

The target was achieved. In 2014 Agropalma Group has achieved RSPO certification to all its FFB suppliers. However, after run a LUCA analysis (in 2015), Agropalma found that one of its current schemed suppliers had liabilities, according the rules of RSPO Remediation and Compensation Procedures. So, farmer was suspended from RSPO Certification. Together with the supplier company has been running a Remediation and Compensation process within RSPO, since 2015. In 2019, RSPO has approved the proposal for compensation and this supplier was re-included in the certified supply base. Other important issue is the fact that few new FFB farmers are becoming part of Agropalma supply base. They start as independent suppliers and if they perform well in terms of production, labor and environmental management, they will be able to be integrated as schemed suppliers. Everytime this happens, these farmers will require a certain time to prepare themselves and obtain RSPO certification. In 2022 few of these suppliers were included in the RSPO audit and got the certification status. Therefore, in 2022 all schemed suppliers has achieved certification. However, due the dynamic nature of Agropalma supply base (we are always seeking to engage with new suppliers), it is not possible to establish a fix deadline. 2014 was registered just because the ACOP system requires a date. In 2023, Agropalma has faced two suspensions in RSPO certificate, which has reduced its certified production in 20% in that year. Agropalma is working to revert the last suspension, that is still standing, pending to solve a critical divergence about legal requirements related to land.

5. Concession Boundaries

5.1 The RSPO General Assembly Resolution 6G (2013) calls for all members with Grower operations to submit maps of their concessions boundaries through ACOP. Has your company submitted concession boundaries up to estate level to the RSPO in previous ACOP cycles as per RSPO Formatting Requirements for Boundary Data Submission?

Yes

5.2 Has your company either acquired any new concession sites, have any concession sites changed ownership or change its boundaries since the previous ACOP map submission?

No

6. GHG Footprint

6.1 What is the average GHG footprint for all certified management units by hectare (tCO₂e/ha)?

-1.03

6.2 What is the average GHG footprint for all certified management units per tonne of crude palm oil (tCO₂e/tCPO)?

-1.03

6.3 What are the key emission sources identified by your company in certified management units?

- Land use change
- Existing cultivation peatland
- Palm oil mill effluent (POME)
- Fertiliser application
- Others

Others

-

6.4 Does your company have a baseline for GHG reporting?

Yes

6.4.1 What is the target baseline (average tCO₂e/tCPO)?

0.20

6.4.2 When is your base year?

2013

6.5 Does your company have an annual GHG emissions reduction/minimising target?

No

7. Support for Oil Palm Smallholders

7.1 How is your company supporting Independent Smallholder groups?

- Sourcing of physical FFB
- Financial support
- Operations support
- Training support
- Community development
- Not supporting Independent Smallholder groups
- Others

Others

-

7.1.1 Please provide the names and locations of the oil palm Independent Smallholder groups that you are currently supporting. This question is not mandatory, and is left to the discretion of the RSPO member to answer.

Not applicable.

7.2 Why is your company not currently supporting independent smallholders?

Until 2023, we had an understanding that it is better focus our resources in supporting our scheme family farmers to assure they perform well, according the RSPO standards. Beyond that, Agropalma is always open to engage with new FFB suppliers, since they understand and formally agree to comply with RSPO P&C and Brazilian Laws, demonstrate implementation on the ground and have a voluntary will to become schemed with Agropalma, agreeing with our high sustainability standards. In such cases, we would provide full support. Considering the definition of independent smallholder is evolving along the years, company could be able to make some adaptation in its current way of engaging with independent smallholders.

7.2.1 Does your company have any future plans to support oil palm Independent Smallholders?

Yes

8. Actions For Next Reporting Period

8.1 Outline activities that your company will undertake in the coming year to advance its certification efforts.

Work hard to re-establish the RSPO certification for plantations and mills. To keep carrying the RaC process (it is not finalized yet) and support new FFB suppliers (if any) to achieve compliance with RSPO P&C. To keep paying a premium price for certified FFB.

8.2 Outline activities that your company will undertake in the coming year to promote the uptake CSPO along the supply chain.

- 1 - Engaging NGOs and other companies to discuss the sustainability of palm oil production in Brazil and the importance of having RSPO as the standard to guide palm oil business in a sustainable way;
- 2 - Providing knowledge and know-how on RSPO to Brazilian and Latin American palm oil companies;
- 3 - Supporting RSPO team in projects to promote RSPO (including working groups, taskforces, etc.);
- 4 - Promoting RSPO among companies that consume palm oil in Brazil and other countries.

We have to register that in both our suspensions, RSPO certification procedures were unfortunately disrespected, what brought to our company a relevant level of uncertainty about the reliability and consistency of our certification. It is difficult for the company make commitments related to certification if we are not sure that the certification procedures are going to be complied with in full.

Agropalma has been developing an intense marketing work to develop the RSPO certified products in Brazil. This work has finally started to provide good results. In this sense, stability of the RSPO certification systems and rules is crucial.

2.5 What is the estimated percentage of Certified Sustainable Palm Oil in the palm oil, palm kernel oil and related products sold, traded or processed by your company in the following regions:

Challenges and Support

1.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

Others

The main obstacles are placed in demand side of the supply chain. As most of Agropalma clients are placed in Brazil, where the demand for Sustainable Palm Products is still low (but increasing). International clients (especially Europeans) are more interested and already buy significant amounts of certified products from Agropalma. A special challenge refers to multinational companies that delay to apply their global sourcing policies related do RSPO in Brazil. To increase demand in internal market Agropalma always promote RSPO and explain the issues and concerns related with sustainability of palm oil production worldwide to consumer companies in Brazil.

1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?

- Communication and/or engagement to transform the negative perception of palm oil
- Engagement with business partners or consumers on the use of CSPO
- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
