## Challenges and Support

### 1.1 What significant obstacles or challenges has your company encountered in the promotion of certified sustainable palm oil (CSPO)? What efforts has your company taken to address these obstacles or challenges?

- Awareness of RSPO in the market
- Difficulties in the certification process
- Certification of smallholders
- Competition with non-RSPO members
- High costs in achieving or adhering to certification
- Human rights issues
- Insufficient demand for RSPO-certified palm oil
- Low usage of palm oil
- Reputation of palm oil in the market
- Reputation of RSPO in the market
- Supply issues
- Traceability issues
- No challenges faced
- Others

#### Others

The main challenges when working with palm derivatives is the availability and overcost of certified raw materials.

Clearly the actual level of transparency is also a difficulty, and this is why we joined ASD in 2020 to have better tools to improve transparency of the supply chain.

Another challenge is also linked to the MB system, as customers have difficulties to understand or trust this system. The Resolution GA18-2c, Enhancing the robustness of the RSPO Mass Balance model, would have helped to improve the adhesion to this model.

When possible, we would like to switch to SG model, but the actual cost and or availability of raw materials don't allow us to do so.

**1.2 In addition to the actions already reported in this ACOP report, what other ways has your company supported the vision of the RSPO to transform markets to make sustainable palm oil the norm?**

- Engagement with government agencies
- Engagement with peers and clients
- Promotion of CSPO through off product claims
- Promotion of CSPO outside of RSPO venues such as trade workshops or industry associations
- Promotion of physical CSPO
- Providing funding or support for CSPO development efforts
- Research & Development support
- Stakeholder engagement
- No actions taken
