('2026')

4.2.1 If the previous target year for G.4.2 has not been met, please explain why

One of the key milestones achieved was the successful implementation of SAP, which now serves as the foundation for our data management and traceability systems. With SAP in place, we have improved our ability to consolidate and verify field data, enhance traceability of Fresh Fruit Bunches (FFB) up to the garden level, and ensure better transparency in our supply chain.

The delays from the previous year related to manpower constraints and initial system setup have been largely addressed. Our focus this year is on leveraging the new SAP system to refine data accuracy, strengthen document validation processes, and finalize all necessary inputs for certification.

We remain committed to achieving certification at the earliest and are actively working towards closing the remaining gaps.
