Também são abordadas as variáveis que influenciaram esse percentual, tais como alterações no ambiente de negócios, evolução das operações e posições de estoque. Volume total de produtos derivados do óleo de palma adquiridos: 976.222 toneladas

Volume de produtos certificados adquiridos: 45.920 toneladas

Percentual de absorção certificada: 4,70%

## 3. Fatores que Impactaram a Absorção Certificada

### 3.1 Mudanças no Ambiente de Negócios

A demanda da indústria cosmética por produtos sustentáveis vem crescendo, mas o custo do óleo de palma certificado ainda representa um desafio competitivo.

Políticas de compras dos clientes influenciam a necessidade de certificação dos insumos.

Flutuações no mercado global de óleo de palma, incluindo alterações regulatórias e restrições comerciais, impactaram a disponibilidade do produto certificado.

### 3.2 Natureza Evolutiva das Operações

Ajustes na estratégia de compras para equilibrar a utilização de produtos certificados com custos operacionais.

Busca por novos fornecedores certificados para ampliar o volume de insumos sustentáveis.

Adoção de processos que otimizam o uso de matérias-primas sustentáveis sem comprometer a eficiência produtiva.

### 3.3 Variações Devidas a Posição de Estoque

Estoques de produtos não certificados adquiridos anteriormente afetaram o percentual de absorção de insumos sustentáveis.

O tempo de reposição de insumos certificados pode ter impactado o percentual de absorção em um período específico.

Variação no mix de produtos demandados pelos clientes, influenciando o percentual final de insumos certificados utilizados.

**4. Considerações Finais**A empresa reforça seu compromisso com a sustentabilidade e a transição para um modelo de fornecimento mais responsável. O percentual de 4,70% de absorção certificada reflete as condições atuais do mercado e das operações, mas há um esforço contínuo para aumentar esse índice. Medidas estratégicas, como parcerias com fornecedores certificados e otimização do estoque, estão sendo implementadas para elevar a participação de insumos sustentáveis nas compras futuras.

## 5. Ações Futuras

Reforço na seleção de fornecedores certificados para ampliar a oferta de produtos sustentáveis.

Monitoramento contínuo das tendências de mercado para ajustar estratégias de aquisição.

Estabelecimento de metas progressivas para aumentar o percentual de absorção certificada ao longo dos próximos anos.

### 3. TimeBound Plan

**3.1 Which year did your company achieve (or expects to achieve) the RSPO supply chain certification or RSPO trader/distributor licence?**

2024

**3.2 Which year did your company start (or expect to start) to source any RSPO-certified palm oil and oil palm products?**

2024

**3.2.1 If the previous target year has not been met, please explain why.**

A meta estabelecida para a absorção certificada de óleo de palma no ano anterior não foi atingida devido a uma combinação de fatores, incluindo:

Disponibilidade Limitada: Restrições no fornecimento global de óleo de palma certificado impactaram a capacidade de aquisição da empresa.

Custo Elevado: O preço do óleo de palma certificado permaneceu alto em comparação aos insumos convencionais, dificultando a expansão da compra dentro dos orçamentos estabelecidos.

Demanda e Expectativas do Mercado: Alguns clientes priorizaram o custo-benefício em detrimento da certificação, o que reduziu a pressão para a aquisição de volumes maiores de insumos sustentáveis.

Estoque Remanescente: O estoque adquirido previamente, composto por produtos não certificados, precisou ser utilizado antes da transição para uma maior absorção de produtos sustentáveis.

**3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why**
