Insufficient demand for RSPO-certified palm oil products and market shortages of certified products continue to present challenges to achieving 100% uptake. 2021

3.2.1 If the previous target year has not been met, please explain why.

The target year was met.

3.3 Which year did your company achieve (or expects to achieve) 100% RSPO certification of all palm product processing facilities.

2022

3.3.1 If the previous target year has not been met, please explain why.

The target year was met.

3.4 Year expected to only source RSPO-certified palm oil and oil palm products.

2028

3.4.1 If target has not been met, please explain why.

Kensing is making great progress to only source RSPO-certified palm oil and palm products by the target year of 2028. While Kensing continues to target 2028, there are still challenges that remain. These include the availability of MB certified palm kernel and subsequent palm kernel oil for palm derivatives. Palm kernel certification is constrained by the corresponding certification of palm oil. If the palm fruit bunches are not certified, the palm kernel cannot be certified. In addition, there is insufficient demand for RSPO-certified palm oil products and market shortages of certified products. Kensing promotes RSPO CSPO in our engagement with customers and affirm our market readiness to meet customer demand for RSPO certified palm products. Kensing is continuing to increase its purchases of RSPO MB products and has joined the Action for Sustainable Derivatives (ASD). Kensing has joined forces with other players to form a consolidated entity to create demand for RSPO certified materials and push the upstream players for more RSPO certification.

3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why

The Time Bound Plan covers all countries in which Kensing operates.
