## 8. Actions For Next Reporting Period

### 8.1 Outline activities that your company will undertake in the coming year to advance its certification efforts.

Our progress and action plan towards our sustainable palm oil commitments are demonstrated through the following key actions:

1. RaCP proposal submitted to RSPO: We have submitted a RaCP plan focused on the support of the restoration and long-term conservation of the Sungai Aur Community Forest in Murao Jambi. This compensation project will increase the community's productivity and support income generation through low-emission agricultural activities, and aligns with RaCP's four key pillars: additionality, long-lasting, equitability, and knowledge based.
2. Enhanced Internal Monitoring Programme: Our sustainability team has established and implemented a rigorous internal audit programme across all our certified sites. This ensure compliance with RSPO standards and identifies areas for improvement, fostering continuous progress.

These two proactive actions demonstrate our dedication to achieve our sustainability goals and solidify our commitment to sustainable palm oil production.

---

### 8.2 Outline activities that your company will undertake in the coming year to promote the uptake CSPO along the supply chain.

1. Capacity Building: We have developed and implemented comprehensive training programmes to educate our suppliers and internal stakeholders on their knowledge and skills necessary to uphold the RSPO standards.

an aggregate level (as in previous ACOP reporting cycles)

**2.2 Total volume of RSPO-certified (IP, MB, SG and RSPO Credits/Book and Claim) and Non RSPO-certified palm oil, palm kernel oil and related product sourced in the year**

**2.4 According to the volume information you have provided in Question PT.2.2 and Question PT.2.3, your company's certified palm oil, palm kernel oil and related products uptake is:**

10.60%

**2.4.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake calculated in PT.2.4. This may include changes due to business environment, evolving nature of operations or variations due to stock positions**

1. High Market Barrier: We are unable to expand our RSPO uptake into emerging markets such as China and India. These buyers are usually very price-sensitive. The higher cost of RSPO products compared to conventional palm oil is a significant barrier. We urgently need to find new markets for our oils. This is especially important because trade tariffs in 2025 will make it much harder for us to export to the USA.

2. Under the EUDR, RSPO products cannot fully comply with the regulations. Failure to comply with the EUDR will result in the inability to place these RSPO products on the EU market.

**2.5 What is the estimated percentage of Certified Sustainable Palm Oil in the palm oil, palm kernel oil and related products sold, traded or processed by your company in the following regions:**

Countries/Regions	Percentage
Europe	37
North America	4
Malaysia	15
Indonesia	0
China	5
India	0
Latin America	0
Africa	0
Rest of World	39

**3. TimeBound Plan**

**3.1 Which year did your company achieve (or expects to achieve) the RSPO supply chain certification or RSPO trader/distributor licence?**

2009

**3.2 Which year did your company start (or expect to start) to source any RSPO-certified palm oil and oil palm products?**

2009

**3.2.1 If the previous target year has not been met, please explain why.**

N.A.

**3.3 Which year did your company achieve (or expects to achieve) 100% RSPO certification of all palm product processing facilities.**

2021

**3.3.1 If the previous target year has not been met, please explain why.**

N.A.

**3.4 Year expected to only source RSPO-certified palm oil and oil palm products.**

2030

**3.4.1 If target has not been met, please explain why.**

We need to acknowledge the current market dynamics. Achieving 100% RSPO-certified raw materials and sales of only 100% certified palm and palm kernel products is not feasible. The current supply of certified crude palm oil (CPO) is limited and expensive, and demand for RSPO-certified products, which is coming mainly from EU, the volume is stable and growth volume is limited. The sales volume is also not sufficient to support fully our refinery processing capacities. Therefore, relying solely on RSPO-certified palm oil/Palm kernel oil currently present substantial economic challenges.

**3.5 If the TimeBound Plan commitments declared above do not cover all countries in which the member operates, please explain why**

N.A.
