4. TimeBound Plan

4.1 Which year did your company achieve (or plans to achieve) its first RSPO P&C certification?

('2025')

4.2 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all its estates and mills?

('2026')

4.2.1 If the previous target year for G.4.2 has not been met, please explain why

OLPESA owns and operates an independent palm oil mill and an independent palm kernel crushing plant, both of which are scheduled to achieve RSPO Supply Chain Certification by 2026.

In May 2024, the ACEPAT Agrarian Cooperative became a member of the RSPO. This membership enables the formation and certification of the first Independent Smallholder (ISH) Group supplying OLPESA with sustainably produced oil palm. The ISH Group is expected to achieve eligibility-level certification in the second half of 2025, and subsequently reach Milestones A and B certification in 2026.

The certification process could not be completed in 2024, neither for the eligibility of the ISH Group nor for the supply chain of the mill. This was due to a situation that significantly affected the regular supply of Fresh Fruit Bunches (FFB) to the mill, caused by increased competition within OLPESA's area of influence, where other companies were offering prices above market value. This scenario altered the established dynamics with the smallholders, making it difficult to meet the necessary commitments to move forward with the certification process. As a result, the certification of the mill will depend on achieving certification of the smallholder group first.

4.4 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all FFB, regardless of source?

('2028')
