**2.4 According to the volume information you have provided in Question PT.2.2 and Question PT.2.3, your company's certified palm oil, palm kernel oil and related products uptake is:**

1.73%

**2.4.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake calculated in PT.2.4. This may include changes due to business environment, evolving nature of operations or variations due to stock positions**

Our uptake is based on demand by clients and the overall demand is still currently low. This is mainly due to the costs involved as well as the complex system of the entire chain being RSPO certified.

In our opinion the importance of certifying the plantations and yields as RSPO should be prioritised to ensure the environmental sustainability, instead of insisting on the whole chain being RSPO certified. This would see an automatic shift in demand as prices would be lower and the system less complex, yet the environment remains the focus.

**2.5 What is the estimated percentage of Certified Sustainable Palm Oil in the palm oil, palm kernel oil and related products sold, traded or processed by your company in the following regions:**
