ACOP reports without reported volume data will be considered as incomplete and will not be accepted. Incomplete ACOP reports may lead to suspension or termination of RSPO membership.*

100.00%

**2.5.1 Please provide additional information on your certified palm oil, palm kernel oil and related products uptake. This may include your usage of RSPO Credits to cover gaps in certified uptake, changes due to business environment, variations due to stock positions or efforts to support independent smallholders beyond volume commitments.**

We yearly ask our suppliers for our Private Brand to report with regard to the volumes of palm (kernel)oil used and the sustainability scheme applied. We also ask our suppliers to opt for physical separated chains (for food we ask RSPO SEG, for non food, MB is acceptable).

Buying credits is our last resort. In principle we want to avoid this. Nevertheless some suppliers are really small or use small quantities and have difficulties accessing RSPO. Since we look at sustainability as a cycle of continuous improvement we admit the use of Conventional Palm oil and we buy 'smallholder RSPO credits ourselves for the volumes not covered by a scheme to reach 100% certified volumes for our Private Label products.

**3.3 Which year did your company begin (or expects to begin) using only RSPO-certified sustainable palm oil and palm oil products from physical supply chain options (Identity Preserved, Segregated and/or Mass Balance) in own-brand products.**

2020

**3.3.1 If the previous target year has not been met, please explain why.**

we need to buy credits for less than 1% of our volume. We have several smaller suppliers (that are using less than a ton palmoil/year) that have difficulties switching (due to cost or lack of knowledge) Othersuppliers are using very small quantities of palmoil (eg 10 kg/year) and a physical supply chain is a bighurdle to take for them. The cumulative use of credits is less than 1%. We keep working on our suppliersto support them to switch but we also consider our target as met. Another option that some of our suppliers are applying is taking palm oil out of the recipe. However from a socia/eocological sustainability perspective this makes little sence due to the efficiency of palmoil. Hence we insist on the importance of making the palmoil used, sustainable via RSPO.
