SUMMARY

- *Who is responsible for certification of the PNG Associated smallholder? Mill or smallholders themselves?*
- *What are the main challenges for certification? Responsibility for ICS? & capacity to do this? Is land tenure an issue?*
- *What is the relation between the associated smallholders in PNG and the mill in PNG? Are smallholders contractually bound to sell to one mill? Are there penalties when the SH does not sell to the PNG mill?*
- *What is the experience with certification: Is there a win/win situation?*

THANK YOU
